

RSK 3131164

Air admittance valve 40 with adapters is used for secondary air admittance, for example in drainage pipes. The air admittance valve 40 is installed with the intention of increasing the capacity and/or reducing the dimension. The air admittance valve has an air flow capacity of 11.3l/s at a negative pressure of 250Pa. The air admittance valve is CE marked and meets the requirements of SS-EN12380 A1. Includes Styrofoam cover and adapter.

Specifications

RSK Number	3131164
Dimension	Ø40-50/75/110 mm
Function	Equalises suppression
Item Color	White
Material	ABS
Pressure Flow Temp	11,3 l/s
Version	Spigot end
