

## RSK 3131162

Air admittance valve 50/40 is used for secondary air admittance, for example in drainage pipes. The air admittance valve 50/40 is installed with the intention of increasing the capacity and/or reducing the dimension. The air admittance valve has an air flow capacity of 11.3l/s at a negative pressure of 250Pa. The air admittance valve is CE marked and meets the requirements of SS-EN12380 A1.

### Specifications

<b>RSK Number</b>	3131162
<b>Function</b>	Equalises suppression
<b>Item Color</b>	White
<b>Material</b>	ABS, TPE
<b>Outlet Dimension</b>	Ø50/Ø40 mm
<b>Pressure Flow Temp</b>	11,3 l/s
<b>Version</b>	Spigot end
