

RSK 7114349

Extension ring 13 in plastic with stainless steel clamping ring for the Purus Line and Purus Corner. The extension ring is used when you need to raise the flange when, for example, pouring concrete. It increases the height by 13mm. A maximum of two extension rings can be combined to achieve the required height. The extension rings should be secured with the 3402328 screws (supplied separately).
