

## RSK 7110406

The S-Series Minimax is a floor drain with a 50mm side outlet and a low construction height of 59mm. It is designed for installation in concrete joists. The S-Series Minimax floor drain comes with a removable NOOD water trap and stainless steel clamping ring. The NOOD water trap is a mechanical trap which closes when there is no water present, thus preventing any foul air from escaping through the drain. The S-Series Minimax requires connection with a joint connector and is not suitable for installation underneath a bath tub. It also comes with a protective cover that is intended to prevent any concrete or debris from installation from entering the drain.

The clamping is for vinyl flooring with a thickness of up to 3 mm.
