

RSK 7113598

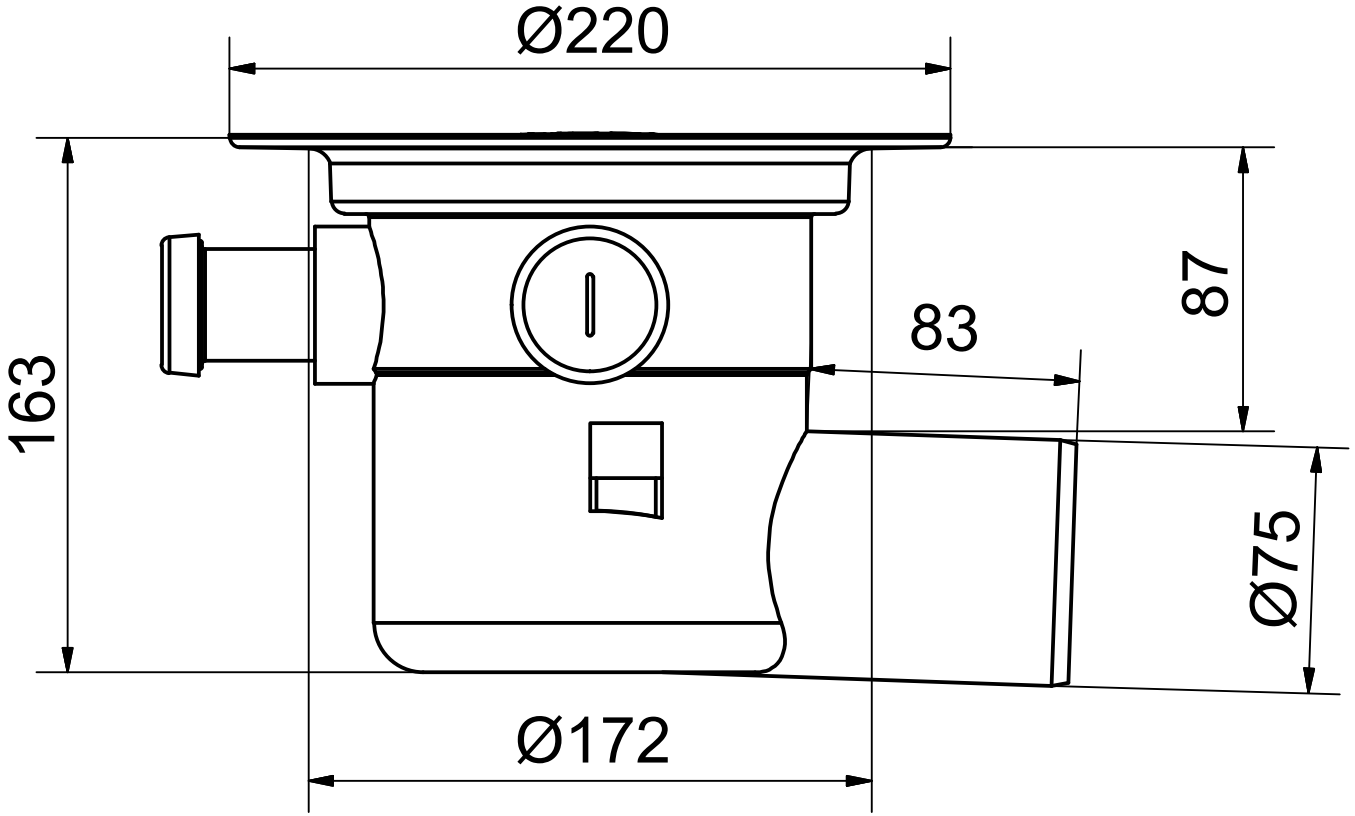

The Våge 75 Side floor drain has a 75mm side outlet and three extra inlets. Only one of the extra inlets should be used. The floor drain has a total height of 163mm and is suitable for installation in concrete floors or wooden joists. The Våge floor drain comes complete with a removable water trap with splash guard, clamping ring and plastic grate. It also comes with a protective cover that is intended to prevent any concrete or debris from entering the drain during installation. When installing the Våge floor drain with the Purus Plate (2014 model), the extension ring should not be used.

The automatic self-adjusting clamping ring is used for both waterproofing membranes and vinyl flooring with a thickness of 1.5mm to 2mm.

Specifications

RSK Number	7113598
Dimension	Ø75 mm
