

RSK 7129555

The NOOD water trap is a mechanical water trap with odour stop, included in the Purus Line and Purus Corner drains with low side outlet gullies. It is designed to close tightly when no water is flowing through and thus prevents any bad odours from escaping through the drain, even when allowed to dry out. It is therefore suitable for environments with low or high usage. The water trap is removable from the drain for ease of maintenance.

RSK 7129555

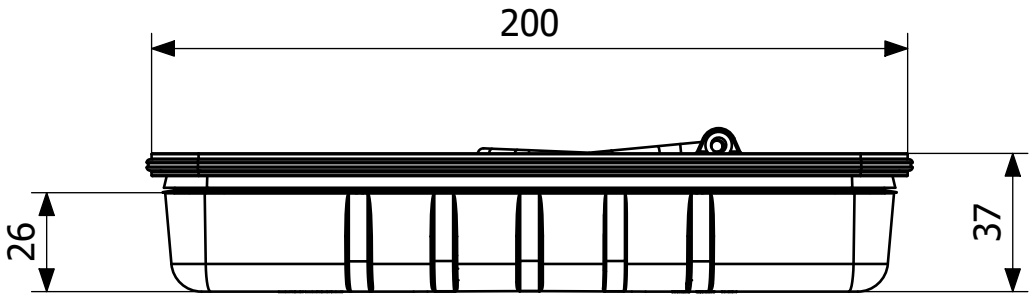

Plastic NOOD water trap for the Purus Line and Purus Corner. The NOOD no-odour water trap is a mechanical odour stop designed to close when there is no water flow, thus preventing odours from escaping through the drain, even when dried out. It is therefore suitable for environments which have little or no water supply for longer periods of time. When water is flowing through, the water trap opens automatically. It can be removed from the outlet gully for easy cleaning and maintenance.
