

RSK 7135138

The Utgård plastic mounting plate is used together with Purus floor drains when installed in wooden joists. The mounting plate is 22 mm thick and has two sides, one ribbed and one smooth. The ribbed side is used for drop filling. If laying tiled floors, the spacer ring should be used. The smooth side is used without the spacer ring for plastic mat if drop filling is not done. The mounting plate is made of ABS plastic with a material-saving technology called MuCell. The surfaces of the plate can be glued.

This mounting plate fits the S-series, Brage, Oden, Freja, Flex and Duschbrunn. Without the spacer ring it also fits Våke, Våge, Freja and Loke.

Specifications

RSK Number	7135138
Floor Construction	Wooden joist
Function	Support frame for wooden joists
Item Color	Blue
Material	ABS
Pressure Flow Temp	K3
Size	300×300 mm
Version	Reversible
