

RSK 7129783

Plastic NOOD water trap for the Channel 100. The NOOD no-odour water trap is a mechanical odour stop designed to close when there is no water flow, thus preventing odours from escaping through the drain, even when dried out. It is therefore suitable for environments which have little or no water supply for longer periods of time. When water is flowing through, the water trap opens automatically. It can be removed from the outlet gully for easy cleaning and maintenance.

## Specifications

Plastic NOOD water trap for the Channel 100. The NOOD no-odour water trap is a mechanical odour stop designed to close when there is no water flow, thus preventing odours from escaping through the drain, even when dried out.
