

RSK 7138427

The Bolja oil barrier is manufactured in plastic and is designed for 220mm diameter floor drains without water traps. The barrier closes tightly when filled with oil. In the event of an oil spill, gaskets must be replaced. Always check with local rules and regulations for installation approval, as the Bolja functions as an oil stop, not an oil separator.

Specifications

RSK Number	7138427
Function	For Bigg and Heavy
Item Color	White
Material	PP
Outlet Dimension	Ø220 mm
Pressure Flow Temp	1,4 l/s
Version	Oil barrier
