

Item 52791

The PUM membrane insert is a spare part for PUM vertical wastes with a G40 connection. The insert is screwed into the chrome lid. The odour barrier (membrane) is integrated in the vertical waste and is positioned under the lid, which can easily be lifted up for in situ cleaning and maintenance. The vertical waste replaces the usual cup-style water trap, saving space underneath the wash basin.

Specifications

Item Number	52791
Item Color	Grey
Material	PP, Silicone
Version	Odour trap
