

RSK 8124020

PUM Pipe connection is used in pipe systems for water outlets and provides easy access for inspection and cleaning of the membrane. PUM Pipe connection is intended for connection to pipe diameter Ø32/40 mm using sleeves or transition couplings.

The PUM membrane acts as a mechanical odour barrier, which is closed in its original position and is opened by the water flow, thus replacing a traditional water trap. The membrane's advantages include easy cleaning, compact installation, and good flow capacity. The membrane also functions as secondary ventilation.

Specifications

RSK Number	8124020
Dimension	Ø40 mm
Function	Odour trap
Item Color	White
Material	PP, TPE, Silicone
Pressure Flow Temp	0,6 l/s
Size	164x53x53 mm
