

Item 52790

The PUM is a combination of a vertical waste and a water trap for the V345 urinal. The odour barrier (membrane) is integrated in the waste, which can easily be lifted up for in situ cleaning and maintenance. The vertical waste replaces the usual cup-style water trap, saving space underneath the urinal. Type approved by RISE.

Specifications

Item Number	52790
Item Color	Black
Material	PP, Silicone
Version	Odour trap
